

Workplace Safety: An Integrated Program

OSHA ETS Compliance, COVID-19 Testing & Vaccine Management

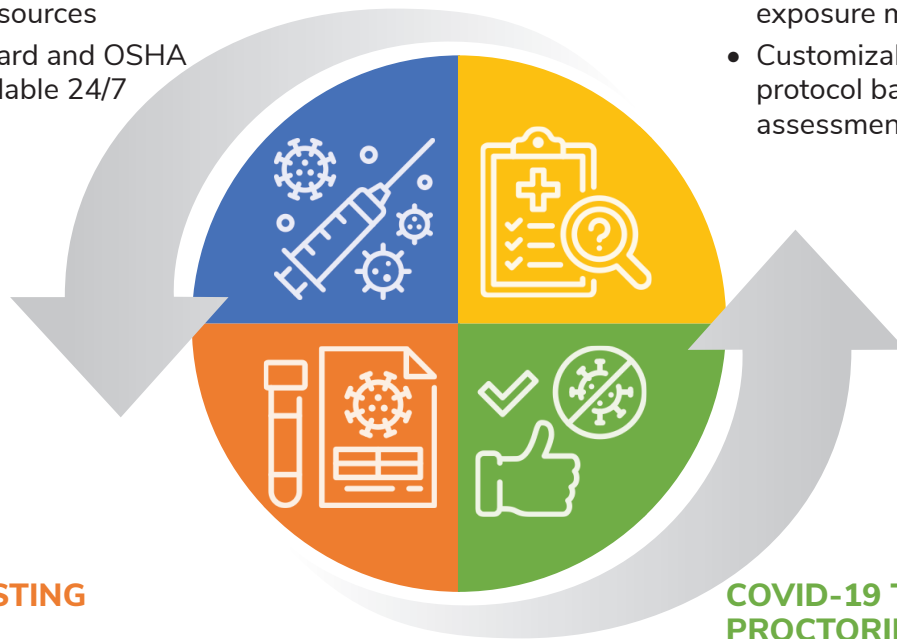

With new variants like Omicron raising concerns across the country, organizations are looking for a partner to help with testing and vaccine management protocols. Our robust, integrated program is customizable to ensure employers are compliant with OSHA's ETS mandate.

VACCINE MANAGEMENT

- Proof of vaccine validation
- Ability to ingest test results from multiple sources
- Client dashboard and OSHA reporting available 24/7

DAILY ASSESSMENTS

- Via email and text
- Employee symptom and exposure management
- Customizable testing protocol based on assessment results

COVID-19 TESTING SOLUTIONS

- rt-PCR 24-hour results (on-site and remote)
- Point of Care rt-PCR results in 1-2 hours
- Antigen testing results in 10-20 min

COVID-19 TEST PROCTORING & VALIDATION

- Test proctoring
- Test validation
- Test results data management

Now providing complimentary genetic testing to all Workplace Safety patients who test positive for COVID-19 virus, by request. This genetic sequencing will test for 8 genetic mutations.
